WHEAT FIBER

Che cos'è esattamente?

La paglia di grano è lo stelo rimasto dopo la raccolta dei chicchi di grano.Tradizionalmente, è stato trattato come uno spreco. In alcuni paesi, gli agricoltori lo bruciano, contribuendo all'inquinamento atmosferico e creando un pericolo per la salute pubblica. Tuttavia, questi gambi hanno ancora valore. Recuperiamo questo materiale e lo utilizziamo per realizzare i nostri prodotti in paglia di grano.

What exactly is it?

Wheat straw is the stalk left over after wheat grains are harvested. Traditionally, it has been treated as a waste. In some countries, farmers burn it, contributing to air pollution and creating a public health hazard. However, these stalks still have value. We recover this material and use it to make our wheat straw products.

ECO

Perché lo usiamo?

Come sappiamo le foreste sono minacciate di estinzione in tutto il mondo, quindi è importante per noi trovare materiali alternativi che non richiedono risorse forestali.
Con la fibra di grano, è ancora possibile utilizzare prodotti di "carta" usa e getta ad alte prestazioni, scegliendo un prodotto che è fatto di fibra di grano rapidamente rinnovabile e rigenerata anziché alberi. Ciò che è ancora piu' rilevante è che alla fine della sua vita, puoi inviare la tua conchiglia alla struttura di compostaggio commerciale anziché a una discarica.

Why do we use it?

As we know forests are threatened and endangered around the world, so it is important for us to find alternative materials that do not require virgin forest resources.
With wheat fiber, you can still use high performing disposable "paper" products, choosing a product that is made from rapidly renewable and reclaimed wheat fiber instead of trees. What's even better is that at the end of its life, you can send your clamshell to the commercial composting facility instead of a landfill.

PLA 100% COMPOSTABLE

Che cos'è esattamente?

La plastica PLA o l'acido polilattico è un materiale plastico a base vegetale, che comunemente utilizza amido di mais come materia prima. Il PLA è un polimero termoplastico completamente biodegradabile costituito da materie prime rinnovabili. La plastica di mais o, a volte, di acido poliacrilattico (PLA) è prodotta come il tessuto di mais ed è biodegradabile al 100%.

Quando il mais viene trasformato in PLA, il PLA può essere trasformato in abbigliamento e prodotti.
L'abbigliamento in PLA è noto per la sua elasticità, poiché mantiene la sua forma dopo più lavaggi. Il PLA è anche noto per la sua capacità di traspirazione

What exactly is it?

PLA plastic or polylactic acid is a vegetable-based plastic material, which commonly uses cornstarch as a raw material. PLA is a fully biodegradable thermoplastic polymer consisting of renewable raw materials.

Corn plastic or sometimes Poly Lactide Acid (PLA) is made in the same way as corn fabric and is 100% biodegradable. When corn is made into PLA, PLA can be transformed into clothing and products. PLA clothing is known for its elasticity, as it will keep its shape after multiple washings. PLA is also known for its ability to spread moisture through fabric so it can evaporate more easily.

Che cos'è esattamente?

Il riciclaggio della carta riguarda i processi di rielaborazione della carta di scarto per il riutilizzo. Le carte di scarto vengono ottenute da cartiera, scarti di carta e materiale di carta di scarto scartato dopo l'uso da parte del consumatore.

What exactly is it?

Paper recycling pertains to the processes of reprocessing waste paper for reuse. Waste papers are either obtained from paper mill, paper scraps, discarded paper materials, and waste paper material discarded after consumer use.

Reducing the overall exposure to toxic chemicals

ORGANIC COTTON

Che cos'è esattamente?

Il cotone biologico (o cotone naturale) è un altro ottimo tessuto ecologico. È coltivato senza l'uso di pesticidi, erbicidi o altri fertilizzanti chimici ed è semplicemente migliore per la salute e l'ambiente. L'agricoltura biologica (cibo e fibre) protegge la salute delle persone e del pianeta riducendo l'esposizione complessiva a sostanze chimiche tossiche da pesticidi sintetici che possono finire nel terreno, nell'aria, nell'acqua e nelle forniture alimentari e che sono associate a conseguenze sulla salute , dall'asma al cancro. Poiché l'agricoltura biologica non utilizza pesticidi tossici, la scelta dei prodotti biologici è un modo semplice per proteggere l'ambiente e se stessi.

What exactly is it?

Organic cotton (or natural cotton) is another great eco friendly fabric. It is grown without the use of pesticides, herbicides or other chemical fertilizers, and is simply better for your health and the environment. Organic agriculture (food and fiber) protects the health of people and the planet by reducing the overall exposure to toxic chemicals from synthetic pesticides that can end up in the ground, air, water and food supply, and that are associated with health consequences, from asthma to cancer. Because organic agriculture doesn't use toxic pesticides, choosing organic products is an easy way to help protect the environment and yourself.

RECYCLED COTTON

PROTECTS THE PEOPLE AND THE PLANET

Che cos'è?

Il cotone riciclato può essere generalmente definito come tessuto di cotone standard convertibile in fibra di cotone che può essere riutilizzato nei prodotti tessili. Il cotone riciclato è anche comunemente chiamato cotone rigenerato. Il cotone riciclato comprende la materia prima riciclata, nonché il cotone usato, ricondizionato e rielaborato.

What is it?

Recycled cotton can be generally defined as converting standard cotton fabric into cotton fiber that can be reused in textile products. Recycled cotton is also commonly referred to as regenerated cotton, reclaimed cotton. Recycled cotton includes recycled raw material, as well as used, reconditioned, and re-manufactured components. There are many benefits in using recycled cotton.

RPET LINE

La nuova linea RPET aiuta a ridurre l'impatto della plastica sull'ambiente. Scopri la multifunzionalità del RPET, il nuovo tipo di plastica non nociva con cui si può realizzare oggi tessuti, teli in microfibra, lanyard, borse, borracce e molto altro!

The new RPET line helps reducing the impact of plastic on the environment. Discover the multifunctionality of RPET, this new type of harmless plastic which enable to create fabric products, microfibre towels, lanyards, bags, water bottles and much more!

STOP OCEAN PLASTIC

R-PET

Che cos'è esattamente?

L' R-PET è il tipo più comune di resina chimica. Per creare R-PET vergine, i produttori estraggono petrolio greggio e gas naturale dalla terra, quindi lo processano e lo riscaldano per formare un liquido fuso. Trasformano questo liquido in fibre per creare tessuto in poliestere, oppure lo stampano e lo solidificano in contenitori di plastica R-PET. Come fibra, il poliestere può essere utilizzato per realizzare qualsiasi cosa, da vestiti e coperte a borse e articoli promozionali.

What exactly is it?

R-PET is the most common type of plastic resin. To create virgin R-PET, producers extract crude oil and natural gas from the Earth, then process and heat it to form a molten liquid. They spin this liquid into fibers to create polyester fabric, or they mold and solidify it into R-PET plastic containers.
As a fiber, polyester can be used to make anything from clothing and blankets to bags and promotional items.

Perché lo usiamo?

L' R-PET viene creato riciclando materie plastiche precedentemente utilizzate come materiali di imballaggio. Questi includono bottiglie di plastica, per esempio. Una volta raccolto, viene smistato e pulito, dopodiché viene trasformato in R-PET, che può quindi essere utilizzato per nuovi imballaggi. Questo è approvato a livello federale e significa effettivamente che puoi dare a ogni bottiglia una nuova vita.

Why do we use it?

R-PET is created by recycling plastics that were previously used as packaging materials. These include plastic bottles, for instance. Once collected, it is sorted and cleaned, after which it is transformed into R-PET, which can then be used for new packaging. This is federally approved and effectively means that you can give each bottle a new lease of life.

ALUMINIUM BOTTLES

Perchè scegliere l'alluminio?

L'alluminio è notevole per la sua bassa densità e la sua capacità di resistere alla corrosione attraverso il fenomeno della passivazione. L'alluminio non è tossico come i metalli pesanti. È classificato come non cancerogeno dal Dipartimento della salute e dei servizi umani.

- Peso leggero
- Protezione UV
- Resistente alla corrosione
- Non magnetico
- Non combustibile
- Riciclabile

Why choosing Aluminium?

Aluminium is remarkable for its low density and its ability to resist corrosion through the phenomenon of passivation. Aluminium is not as toxic as heavy metals. It's classified as a non-carcinogen by the United States Department of Health and Human Services.

- Light Weight
- UV Protection
- Corrosion Resistant
- Non - Magnetic
- Non - Combustible
- Recyclable

STAINLESS STEEL

Perchè scegliere l'acciaio inossidabile?

L'acciaio inossidabile è particolarmente noto per la sua resistenza alla corrosione. Le aggiunte di molibdeno aumentano la resistenza alla corrosione nella riduzione degli acidi e contro l'attacco corrosivo nelle soluzioni di cloruro. Pertanto, esistono numerosi gradi di acciaio inossidabile con diversi contenuti di cromo e molibdeno per adattarsi all'ambiente che la lega deve sopportare. La resistenza alla corrosione e alle macchie, la bassa manutenzione e la lucentezza familiare rendono l'acciaio inossidabile un materiale ideale per molte applicazioni, in particolare cibi e bevande.

Save the blue planet

Perché usiamo L'ACCIAIO?

È usato perché è:

- non tossico
- non assorbente
- resistente agli acidi
- stampabile
- incisione laser

Why do we use STEEL?

It's used because it is:

- non-toxic,
- non-adsorptive
- acids resistance
- laser engraved
- printable

Why choose STAINLESS STEEL?

Stainless steel is most notable for its corrosion resistance. Additions of molybdenum increases corrosion resistance in reducing acids and against pitting attack in chloride solutions. Thus, there are numerous grades of stainless steel with varying chromium and molybdenum contents to suit the environment the alloy must endure. Resistance to corrosion and staining, low maintenance, and familiar luster make stainless steel an ideal material for many applications expecially food and drink.

Light and good for drinking

tritan™

Che cos'è il tritan?

Il tritano è un polimero ed il polimero è una sostanza formata dalla combinazione di diverse molecole identiche (monomeri) tra loro. È senza BPA e non contiene il bisfenolo A. È definito come materiale di nuova generazione perché presenta eccellenti caratteristiche quali: resistenza alle temperature e possibilità di essere lavato frequentemente.

È usato perché è:
- non tossico
- frequentemente lavabile
- resistente alle alte temperature
- stampabile
- senza il BPA

What is tritan ?

Tritan is a polymer and the polymer is a substance formed by the combination of several identical molecules (monomers) between them. It is BPA-FREE and it does not contain the toxic chemical Bisphenol A.
It is defined as a new generation material because it has excellent characteristics such as: resistance to temperatures, possibility of being washed frequently.

It's used because it is:
- non-toxic,
- wash frequently
- resistance to temperature
- BPA-FREE
- printable

BESPORTIVE

*La Linea **SPORT BESPOKE** offre ad appassionati e sportivi il massimo del comfort con il vantaggio di un capo completamente personalizzato.*

Il kit nasce da un rotolo di tessuto 100% poliestere che viene prima personalizzato in sublimazione, poi tagliato a laser ed infine cucito in sartoria.

Grazie a questo processo, è possibile realizzare capi unici che grazie al tessuto 100% poliestere a fibra elastica avranno colori sgargianti e duraturi (anche dopo diversi lavaggi), ma anche una perfetta aderenza al corpo, per movimenti fluidi e funzionali.

*The **SPORT BESPOKE** Line offers passionate sportspeople maximum comfort, with the great advantage of a completely customized garment.*

The kit comes from a roll of 100% polyester fabric that is first personalized in sublimation, then laser cut and finally carefully sewn.

Thanks to this process, it is possible to create unique garments that, thanks to the 100% polyester fabric and elastic fiber, will have bright and long-lasting colors (even after several washes), but also a perfect adherence to the body, for fluid and functional movements.

Bespoke

MADE FOR YOU

Your idea today can become reality

BESPOKE, un brand creato per offrirti un servizio import esclusivo.
Ciò che può essere immaginato, può essere realizzato!

Offre un servizio esclusivo di sviluppo del prodotto, dal design sino alla realizzazione e certificazione dell'intero processo produttivo.
Fornire un servizio import completo nello sviluppo di un marchio o nella realizzazione di campagne promozionali richiede una certa professionalità. **BESPOKE**, con più di 40 anni di esperienza nel mercato orientale, rappresenta il partner ideale.

Attraverso i nostri processi produttivi, **BESPOKE** può realizzare qualsiasi tipo di prodotto, dall'abbigliamento promozionale alle divise da lavoro e PPEs, così come oggetti promozionali ideali per qualsiasi occasione e/o attività promozionale.

BESPOKE, a new brand for an exclusive import service.
What can be imagined, can be developed!

It offers an exclusive service of development of the product, from designing and sourcing, to the realization and certification of the whole process.
Offering in great style one's own brand or promotional campaign requires a professional in import. **BESPOKE**, with its more than 40 years presence in the eastern market is the ideal partner.

Through our production bases, **BESPOKE** can produce any kind of product, from a piece of clothing for promotion to work uniforms and PPEs – but also promotional items suitable for any occasion and / or merchandising.
